Information for Subscribers

The American Journal of Epidemiology is published monthly, two volumes of six issues appearing each year. Subscriptions are on an annual basis and are entered to begin with the January issue. Renewals are billed in advance of the calendar year. US, $40.00 (single issues $4.00); foreign, $45.00 (single issues $5.00). All subscriptions must be paid for in advance in US dollars drawn on a US bank.

The Society for Epidemiologic Research (SER). The Journal is sponsored by the SER, and SER dues include a one-year subscription to the Journal. Dues for the Society for 1977–1978 are $25.00 US, Mexico and Canada; $30.00 foreign. Full-time graduate students are eligible for student membership at $15.00 for US, Mexico and Canada, and $20.00 foreign. SER dues should be sent to the Journal office. All SER subscriptions are for personal use only and may not replace regular institutional subscriptions. For further information on the SER write to Dr. Susan T. Sacks, Secretary-Treasurer, Society for Epidemiologic Research, School of Public Health, University of California, 2120 Berkeley Way, Berkeley, CA 94720, USA.

Special Subscriptions. Available to members of: American College of Preventive Medicine; American Epidemiological Society; Epidemiology and Veterinary Sections of the American Public Health Association; Association of Teachers of Preventive Medicine; Epidemic Intelligence Service; International Epidemiological Association; Section of Neuroepidemiology of the American Academy of Neurology; Association for Practitioners in Infection Control. The special rate of $20.00 US, $22.50 foreign in no way implies sponsorship of the Journal by these organizations. As with SER subscriptions, these subscriptions are for personal use only and may not replace regular institutional subscriptions.

Back issues. Back issues for 1975 and 1976 are available from the Journal office; Volumes 67-100 (1958-1974) from Kraus Periodicals, Route 100, Millwood, NY 10546, USA; Volumes 1-66 (1921-1957) from Johnson Reprint Co., 111 Fifth Avenue, New York, NY 10003, USA.

Microfilms. Microfilms of the Journal are available from Waverly Press, Inc., Attn., Ms. Joan B. Schuman, Microfilm Sales Dept., 428 E. Preston St., Baltimore, MD 21202, USA.

Change of address. If you change your address, or if you need to write to us about your subscription for some other reason, please enclose a mailing label from an old issue or provide in full both your old and new addresses and name, and include the four-digit ID subscription number (given on the mailing label at top left, above name).

Missing issues. If you are missing an issue, please allow three months from publication date before requesting a replacement.

SPECIAL REED-FROST SYMPOSIUM ISSUE

The complete series of papers presented at the Reed-Frost Symposium on Biostatistics and Epidemiology held on April 30, 1976 to mark the Centennial of The Johns Hopkins University constituted a recent issue of the *American Journal of Epidemiology* (Volume 104, Number 4, 1976). Additional copies of this issue, at $4.00 a copy, may be ordered from the Journal office, 615 N. Wolfe Street, Baltimore, Md. 21205.

POSTDOCTORAL FELLOWSHIPS IN EPIDEMIOLOGY

The Department of Epidemiology of the Johns Hopkins University School of Hygiene and Public Health announces an expanded program of postdoctoral fellowship opportunities in chronic disease epidemiology with major emphasis on cardiovascular diseases and cancer. Programs lead to a Master’s or Doctorate Degree and postdoctoral training without a degree goal is also available. There is also an approved residency program in preventive medicine. Stipend support at established N.I.H. postdoctoral levels is available for qualified candidates. For information write Leon Gordis, M.D., Professor and Chairman, Department of Epidemiology, The Johns Hopkins University School of Hygiene and Public Health, 615 N. Wolfe Street, Baltimore, Maryland 21205.
MEMOIR OF K. F. MEYER COMPLETED

An oral history memoir of the late Karl F. Meyer (1884–1974) has just been made available by the Regional Oral History Office, University of California, Berkeley. Entitled *Medical Research and Public Health*, the memoir deals with Doctor Meyer's more than 50 years of active research in the field of infectious diseases in the United States and California in particular. The account covers major evolutionary aspects of medical research and public health for most of this century.

Beginning with a chapter dealing with his early years in Switzerland and his education at the University of Zurich, Doctor Meyer tells about his career in South Africa, where he worked as a pathologist with Arnold Theiler, his brief stay at the University of Pennsylvania, and his arrival at the George Williams Hooper Foundation for Medical Research in San Francisco. Although he was Professor and Chairman of the Departments of Bacteriology and Microbiology at both UC San Francisco and UC Berkeley, his research career was largely based at the Hooper Foundation. As Director of the Foundation from 1924 onward, he focussed efforts on epidemiology and control of infectious diseases of public health significance. He was the recipient of many national and international awards in recognition of his achievements.

Separate chapters cover a diversity of areas with which his name is identified: botulism, brucella, psittacosis, leptospirosis, plague, arbovirus encephalomyelitis, etc. The 439-page memoir includes brief recollections of "K. F." by his colleagues Sanford S. Elberg, Lucile E. Foster, Julius Schachter, and James H. Steele. The interviews were conducted by Edna T. Daniel in 1961 and 1962.

The manuscript is open for research at The Bancroft Library, University of California, Berkeley; Library, University of California, San Francisco; and Library, University of California, Los Angeles. Copies are available to other manuscript libraries at cost ($40) from the Regional Oral History Office, The Bancroft Library, University of California, Berkeley, California 94720.
18TH ANNUAL CONFERENCE ON
CARDIOVASCULAR DISEASE EPIDEMIOLOGY
MARCH 13-16, 1978

The 18th Annual Conference on Cardiovascular Disease Epidemiology, sponsored by the Council on Epidemiology of the American Heart Association, the National Heart and Lung Institute and the American Heart Association, Central Florida Chapter, will be held on March 13th through 16th, 1978, at the Dutch Inn and Golf Resort Hotel in Orlando, Florida. Orlando is the site of Walt Disney World.

Dallas, Texas 75231

ASSOCIATE PROFESSOR-EPIDEMIOLOGY

The University of Minnesota School of Public Health announces the availability of a full-time research and teaching position in its Division of Epidemiology. The research responsibilities will initially involve analytic and interpretive processing of accumulating data on existing research projects but can be expanded by the individual's initiative. Individuals with an M.D., D.V.M., or D.D.S. and a public health degree or with a Ph.D. or Sc.D. in epidemiology are encouraged to apply. Applicants should have teaching and research experience in epidemiology, preferably, but not exclusively, in cancer. The position is immediately available on a contract basis. The salary is negotiable.

Contact:

Leonard M. Schuman, M.D., Director
Division of Epidemiology, 1-117 HSUA
515 Delaware St., S.E.
Minneapolis, MN 55455

An Affirmative Action/Equal Opportunity Employer
EPIDEMIOLOGIST

A position is available for an Epidemiologist (M.D., Ph.D., or Dr.P.H.) to participate in a large community study of cardiovascular disease risk factors on children. Interest in implementation and management of field projects is desirable with opportunities for both laboratory and clinical research. Salary and academic rank commensurate with experience. Appropriate departmental affiliations can be arranged.

Send curriculum vitae and letter of specific interests to:

Gerald S. Berenson, M.D.
Specialized Center of Research
LSU Medical Center
1542 Tulane Avenue
New Orleans, LA 70112

DIRECTOR FOR PROFESSIONAL EDUCATION

ASSOCIATION OF SCHOOLS OF PUBLIC HEALTH, WASHINGTON, DC

Needed to plan a coordinated education program collaboratively with the 20 member schools of the Association. The plan would include inter-relationships with other schools and organizations involved in education for public health. Pertinent areas would include, but not be limited to, follow-up to the Milbank and Kellogg Commission Reports, coordination of continuing education activities, development of teaching institutes on selected subjects, clearing house functions, and faculty and curriculum development. The Director for Professional Education would be expected to seek support for special projects and studies to implement the plan.

Preferred qualifications include a doctorate in a field pertaining to education for public health; faculty experience; and demonstrated ability to plan, organize, and implement a comprehensive program. Salary negotiable with contract. Position located in Washington, DC.

Direct applications to: Dr. John H. Bryant, Chairperson, Search Committee, c/o Association of Schools of Public Health, 1825 K Street, NW, Suite 707, Washington, DC 20006.
Columbia University School of Public Health seeks a Head for its Division of Epidemiology. The Division, one of the School's largest, with 17 full-time and eight part-time faculty, provides a wide range of required and elective courses for all degree programs in the School and its affiliates: Master of Public Health (Epidemiology), Master of Science (Epidemiology), Doctor of Public Health (Epidemiology) and Doctor of Philosophy (offered through the Graduate Faculties of Arts and Sciences). Courses are also provided to medical students and other students in the health sciences.

An active research program is conducted through eight functioning research units. Current areas of investigation include (but are not limited to) epidemiology of mental retardation and mental illness, spontaneous abortion and fetal defect, methadone maintenance evaluation, air pollution, prenatal nutrition and child development, cancer risk in occupational groups, prenatal factors in childhood leukemia, birth order, family size and intelligence, fertility in large urban centers, and environmental factors in health.

Requirements: M.D., Dr.P.H. or Ph.D. with extensive teaching and research experience in epidemiology in an academic setting. Demonstrated administrative ability.

Send resumés to:

Bernard Challenor, M.D.
Chairman, Search Committee
Office of the Dean
College of Physicians and Surgeons
630 West 168th Street, Room 3-410
New York, New York 10032

AN EQUAL OPPORTUNITY EMPLOYER
Information for Contributors

The *American Journal of Epidemiology* publishes original field and laboratory contributions on infectious and non-infectious acute and chronic diseases and related statistical studies. Editorials, reviews and comments on various aspects of epidemiologic research and letters to the editor are also published.

**Copyright.** It is understood that when a manuscript is submitted to the Journal the data have not been published previously (except if a commentary) nor is the paper under consideration for publication elsewhere. Upon acceptance by the Journal, a paper may not be submitted elsewhere for simultaneous or later publication, whether as a whole or in an altered version, without written permission of the Journal. Published manuscripts are the sole property of the Journal, copyrighted in the name of the Johns Hopkins University School of Hygiene and Public Health.

**Manuscripts.** Authors are advised to consult the *detailed instructions for preparation of manuscripts*, available on request from the editorial office. Manuscripts should be double-spaced on one side of 8½ x 11-inch paper. A current issue of the Journal provides a general guide to the format of manuscripts. The original and two complete copies, including tables and figures, are required. The cover letter should be in duplicate. Include phone number in cover letter.

**Abstract and Keywords.** An abstract not exceeding 200 words and a list of not more than 8 keywords are published with each article in the Original Contributions section. *Biological Abstracts* carries directions for the preparation of abstracts in its January issue each year. Keywords (in alphabetical order) should be selected as far as possible from a current copy of the National Library of Medicine's *Medical Subject Headings (MeSH)*.

**Abbreviations.** An alphabetical list of abbreviations used in the paper, and their meanings, should be supplied. Abbreviations should be defined the first time used in the text.

**References.** References are consecutively numbered (in parentheses) in the text. The list of references should be double-spaced and should follow the style of *Index Medicus*. Inclusive pages are required.

**Tables and Figures.** Tables should be numbered in the order in which they are mentioned in the text. Glossy prints of line cuts and half-tones are required. If figures or tables are taken from a previously published paper (whether the author's or another's), the contributor must provide written permission from the copyright holder.

**Charges.** Effective January 1, 1978, authors will be charged $55 per page for printed pages in excess of 4. (Multi-part papers in a single issue are considered a single contribution in computing charges for printed pages over 4.) Because of financial restrictions, waiver of excess page charges can be granted only in cases of undue hardship (requests for waiver of page charges must be made at the time the manuscript is submitted). A flat rate of $20 is charged per article for author's alterations; additional charges may be assessed for changes in tables and figures and lengthy or numerous changes in text.

**Reprints.** Authors are requested to order enough reprints to meet anticipated needs. Authors should send reprint orders to Waverly Press, Inc., Mt. Royal and Guilford Aves., Baltimore, MD 21202, USA. Published manuscripts may not be reproduced without permission of the Journal. If the supply of reprints is exhausted, or if the author fails to order reprints before the issue is published, the author should contact the Journal office for rate schedules and specific permission to reproduce.
