The American Journal of Epidemiology (formerly the American Journal of Hygiene), founded in 1920 by W. H. Welch and W. H. Howell, is published by The Johns Hopkins University School of Hygiene and Public Health. The Journal is supported in part by a bequest from the DeLamar Fund and is sponsored by the Society for Epidemiologic Research. Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.
Sixth Annual

EPIDEMIOLOGY
SUMMER PROGRAM

Will Be Held On The Campus Of Tufts University
July 27 - August 15, 1986

The three-week summer program in epidemiology will be hosted in 1986 by Tufts University at its Medford campus, convenient to Boston. The program includes methodologic and substantive courses for those seeking a review of recent developments in epidemiologic thinking. Registrants may receive graduate degree credit, CME credit and industrial hygiene CM credit. The following courses will be offered:

- Theory & Practice of Epidemiology, I
  Anders Ahlbom
  Karolinska Institute/Sweden

- Theory & Practice of Epidemiology, II

- Theory & Practice of Case-Control Research
  Stephan Lanes & Charles Poole
  Epidemiology Resources Inc.

- Biostatistics for Epidemiologists
  Harland Austin
  Univ. Alabama/Birmingham

- Regression and Categorical Data Methods
  Stanley Lemeshow, Univ. Mass.

- Nutritional Epidemiology
  Walter Willett, Harvard Univ.

- Microcomputers for Epidemiologists
  Harris Pastides, Univ. Mass.

- Data Acquisition & Management
  Dean MacLaughlin, Cristina Cann & David Eaglesfield

- Epidemiologic Basis for Public Policy
  Philip Cole, Univ. Alabama/Birmingham

- Logistic Regression & Survival Analysis
  David Kleinbaum
  Univ. North Carolina

- Environmental & Occupational Epidemiology
  Ralph Buncher/Univ. Cincinnati

- Cancer Epidemiology
  Dimitrios Trichopoulos/Univ. Athens

- Biomedical Writing
  Eli Chemin, Harvard Univ.

- Reproductive & Perinatal Epidemiology
  Lowell Sever

PRODAS™
Professional Database Analysis System
Database - Statistics - Graphics

• Programming Language • Syntax caters to SAS users
  Full Screen Data Entry • Equivalent to 23 SAS
  Random Database Access statistical procs.
  Multi-dimension Arrays • Bitmapped graphics
• Menu builder • X-Y plots
• Full screen text editor • Bar charts
• Multikeyed databases • Pie charts
• Direct import and export • Full screen database editor
  Lotus dBase • Over 1 year of use
  DIF Basic • Over 100 installations
• Batch and Interactive Modes • IBM-PC/XT with 256k.

Call or write for more information. Better yet, order our $40 evaluation system.

Renewal Advice

The subscription department is now accepting renewals for 1986. Please note that the regular, full-rate subscription includes a paperbound copy of Volume 8 of Epidemiologic Reviews, our annual review in the field of epidemiology:

domestic subscription $84.00
foreign subscription $89.00

Send payment to

American Journal of Epidemiology, Dept. A
624 N. Broadway, Room 225
Baltimore, Maryland 21205, USA

Payment should be in US funds drawn on a US bank. Note that all subscriptions are on a calendar year basis, January to December. Individuals should see Information for Subscribers and Advertisers for information about personal subscriptions through membership in the Society for Epidemiologic Research and half-rate subscriptions available to members of certain other associations.
SHORT COURSE
QUANTITATIVE METHODS IN EPIDEMIOLOGY
THE HYATT REGENCY, ATLANTA, GA
January 20–24, 1986

An application-oriented course for epidemiologists and other health/medical researchers or practitioners. Topics include validity and precision, design of various types of studies, confounding, interaction, matching, stratification procedures, unconditional and conditional likelihood methods for multivariable logistic regression analysis, and general analysis strategies; all discussions are highlighted with realistic numerical examples.

Instructors: David G. Kleinbaum and Lawrence L. Kupper, Professors, University of North Carolina at Chapel Hill, School of Public Health.

For information costs, course details, lodging, etc., write or call Patty Reed, Director of Field Study, Hoffmann Research Associates, Inc., PO Box 1139, Chapel Hill, NC 27514 (phone: 919/967-2244).

Symposium on
CALORIES AND ENERGY EXPENDITURE IN CARCINOGENESIS
February 24 and 25, 1986
Capital Hilton, Washington DC

Results from many areas of nutrition research indicate that calories and energy expenditure play key roles in carcinogenesis. This conference will examine animal and human studies pertaining to this indication. A particularly important goal will be to provide direction for research to define more specifically the role of diet in human cancer.

The symposium planning committee has been co-chaired by Michael Pariza, Ph.D., of the University of Wisconsin and Lionel Poirier, Ph.D. of the National Cancer Institute. Other planning committee members have been Saxon Graham, Ph.D. (State University of New York at Buffalo), George Irving, Ph.D. (FASEB), David Kritchevsky, Ph.D. (The Wistar Institute), and Artemis Simopoulos, M.D. (National Institutes of Health). International Life Sciences Institute - Nutrition Foundation (ILSI-NF) is sponsoring the conference. Application for continuing education credits for physicians and dietitians has been made.

For further information contact Wendy Gasch, ILSI-NF, 1126 Sixteenth Street, N.W., Suite 111, Washington, DC 20036, (202)659-0074.
