Sixth Annual

EPIDEMIOLOGY SUMMER PROGRAM

Will Be Held On The Campus Of Tufts University
July 27 - August 15, 1986

The three-week summer program in epidemiology will be hosted in 1986 by Tufts University at its Medford campus, convenient to Boston. The program includes methodologic and substantive courses for those seeking a review of recent developments in epidemiologic thinking. Registrants may receive graduate degree credit, CME credit and industrial hygiene CM credit. The following courses will be offered:

Theory & Practice of Epidemiology, I
Anders Ahlbom
Karolinska Institute/Sweden

Data Acquisition & Management
Dean MacLaughlin, Cristina Cann
& David Eaglesfield

Theory & Practice of Epidemiology, II

Epidemiologic Basis for Public Policy
Philip Cole, Univ. Alabama/Birmingham

Theory & Practice of Case-Control Research
Stephan Lanes & Charles Poole
Epidemiology Resources Inc.

Logistic Regression & Survival Analysis
David Kleinbaum
Univ. North Carolina

Biostatistics for Epidemiologists
Harland Austin
Univ. Alabama/Birmingham

Environmental & Occupational Epidemiology
Ralph Buncher/Univ. Cincinnati

Regression and Categorical Data Methods
Stanley Lemeshow, Univ. Mass.

Cancer Epidemiology
Dimitrios Trichopoulos/Univ. Athens

Nutritional Epidemiology
Walter Willett, Harvard Univ.

Biomedical Writing
Eli Chernin, Harvard Univ.

Microcomputers for Epidemiologists
Harris Pastides, Univ. Mass.

Reproductive & Perinatal Epidemiology
Lowell Sever

Short Course
MULTIVARIABLE MODELING OF EPIDEMIOLOGIC DATA
Westin Peachtree Plaza, Atlanta, GA
March 17-21, 1986

An application-oriented course for epidemiologists, biostatisticians, and other health/medical researchers or practitioners who need to have an up-to-date synthesis of current regression procedures available for analyzing epidemiologic data. Topics include overviews of the key quantitative issues in epidemiologic research and of the general principles of regression analysis, strategies for valid model building, a general discussion of maximum likelihood methods, unconditional and conditional logistic regression analysis, Poisson regression methods, survival analysis, and regression diagnostic procedures. All topics are illustrated with real-life epidemiologic data sets.

Instructors: David G. Kleinbaum and Lawrence L. Kupper, Professors, University of North Carolina at Chapel Hill, School of Public Health.

For information on costs, course details, lodging, etc., write or call Patty Reed, Hoffmann Research Associates, P.O. Box 1139, Chapel Hill, NC 27514, (919) 967-2244.

Student Workshop on Epidemiologic Methods

The Society for Epidemiologic Research (SER), in association with the National Cancer Institute, is happy to invite applications from students for participation in a one-day workshop on epidemiologic methods. The workshop will be held on Tuesday, June 17, 1986 in Pittsburgh, Pennsylvania immediately preceding the Nineteenth Annual Meeting of SER, June 18-20, 1986.

Twelve students will be selected for the workshop, which will be conducted by a faculty of four persons prominent in epidemiology and biostatistics.

Students selected for participation in the workshop will be awarded a fellowship to cover the cost of travel and a minimum of two days per diem. To be eligible, applicants should be currently enrolled in a program in epidemiology (Master's or Doctoral) or preventive medicine. Applicants are asked to submit a 2-3-page paper describing their research projects. The projects may be in the design phase, the analysis phase, or anywhere in between. The report may also be accompanied by one or two pages of tables and/or figures.

The cover page of the report should contain the following information: applicant's name, address, telephone number and school affiliation, title of the project, academic advisor's name and signature, and name of department chairperson. The report should be typed double-spaced on 8-1/2 x 11 inch paper. Applications should be postmarked by March 1, 1986 and sent to: Susan Sacks, Ph.D., Syntex Research (A4-200), 3401 Hillview Avenue, Palo Alto, CA 94303.

If there are any questions concerning the workshop, please feel free to contact Dr. Sacks in California at (415) 855-6001. We in SER are looking forward to sponsoring a workshop which we feel will be a stimulating experience for students.
