ERRATA

Irwig et al. have brought to the Journal’s attention the following two errors that appeared in their article, “Efficient Study Designs to Assess the Accuracy of Screening Tests” (1):

1. The formula at the top of page 763 should read

\[
\begin{align*}
\chi^2 & = \frac{(sn + sp - 1) - sn \cdot sp + \sqrt{sn(1 - sn)sp(1 - sp)}}{sn + sp - 1}
\end{align*}
\]

2. The abbreviated formula for \( \text{Var}\{\logit(sn)\} \) in the middle of page 768 just under equation 3 incorrectly states \( w^* \) as the left hand side. The \( w^* \) should be deleted.

The Journal regrets any inconvenience these two technical printing errors may have caused.

REFERENCE

In the letter by Clark and Kissinger (1) concerning the article by Caiaffa et al., “Bacterial Pneumonia in Adult Populations with Human Immunodeficiency Virus (HIV) Infection” (2), there is an error in table 1. The second boxhead of table 1 should be “Two or more (n = 2,243).”

In the authors’ reply (3) to the letter by Clark and Kissinger, the following correction in reference 1 should be noted: Am J Epidemiol 1995;141:176–7.

The Journal regrets these errors.

REFERENCES

In the authors’ response to the letter by Ballard-Barbash et al. (1) concerning the article by Steinmetz et al., “Vegetables, Fruit, and Colon Cancer in the Iowa Women’s Health Study” (2), several inadvertent errors were found in the published version. In the first paragraph the comparison group should be nonconsumers, not nonsmokers. In the third paragraph, the last part of the first sentence should read: “. . . nearly identical to the unadjusted odds ratios (0.7 and 0.65, respectively, compared with nonconsumers).” Finally, the affiliation should read Cancer Prevention Research Unit.

The Journal regrets these errors.
