Year after year, this journal has consistently increased its Impact Factor. As the recently published 2009 ISI Science Citation Index shows, this upward trend is continuing. The Impact Factor now stands at an amazing 17.5 and Epidemiologic Reviews is ranked top out of 122 journals in the Public, Environmental, and Occupational Health category.

Published once a year, Epidemiologic Reviews gathers together review articles on a particular subject. Some of the most recent issues have focused on:

- Epidemiologic Approaches to Global Health
- Epidemiologic Research on Health Disparities
- The Obesity Epidemic
