PROFESSIONAL OPPORTUNITIES

COLUMBIA UNIVERSITY MAILMAN SCHOOL OF PUBLIC HEALTH

Associate Research Scientist

The Mailman Department of Population & Family Health, Mailman School of Public Health seeks an Associate Research Scientist (ARS) to work with the Advancing Research on Comprehensive Health Systems (ARCHS) Program. The ARS will work on the Connect Project, a large-scale health systems implementation and research project in Tanzania. The ARS will contribute to scientific and technical leadership through demographic and epidemiologic research, writing and dissemination of Connect results, and development and advocacy around new funding proposals. Requirements: PhD in demography, health systems, or epidemiology.

Candidates can apply at www.columbia.edu

Recruitment for Academic Personnel (RAPS)

COLUMBIA UNIVERSITY IS AN EQUAL OPPORTUNITY/AFFIRMATIVE ACTION EMPLOYER.

DEPARTMENT OF EPIDEMIOLOGY

GEIDE SCHOOL OF MEDICINE

AT DARTMOUTH

ASSISTANT OR ASSOCIATE PROFESSOR IN EPIDEMIOLOGY

The Geisel School of Medicine at Dartmouth invites applications for a tenure-track Assistant or Associate Professor position with a research emphasis in molecular epidemiology. The appointment will lie in the Department of Epidemiology with an affiliation with the Center for Molecular Epidemiology at Dartmouth. Additional affiliations within a broad range of innovative interdisciplinary research centers are available including the Norris Cotton Cancer Center, Dartmouth SHINE and the Children’s Environmental health and Disease Prevention Research Center. Teaching and interaction with undergraduates, graduates, and post-doctoral fellows are available, including through our Institute of Quantitative Biomedical Sciences PhD program and other programs.

Applications should hold a doctoral degree (PhD, MD) or the equivalent— for MD applicants a MPH or MS degree in epidemiology is desirable. Strong preference will be given to applicants with an established track record in interdisciplinary collaboration as well as innovative ideas and experience from which to build a strong externally funded research program.

Founded in 1972, the Geisel School of Medicine at Dartmouth draws on the resources of Dartmouth College, Dartmouth-Hitchcock Medical Center and the Norris Cotton Cancer Center to support broad interdisciplinary programs in biomedical research, education, patient care and service. The newly formed Department of Epidemiology offers a growing research program with diverse areas of expertise such as molecular-genetic epidemiology, nutrition and chronoprotection, epigenetics, children’s health, cancer, environmental health, pharmacoeconomics, global studies, and much more.

The Geisel School of Medicine at Dartmouth is an academic institution located in Lebanon, New Hampshire in the Upper Connecticut River Valley with easy access to the coastal waters and the mountains. Home to Dartmouth College, the Upper Valley is a vibrant, academic and professional community offering excellent schools, lively arts, and an unmatched quality of life in a beautiful, rural setting.

Review of applications will begin immediately and continue until the position is filled. Submission should include a letter describing the background and interests of the applicant, curriculum vitae, and names and contact information for three references.

Applicants are encouraged to apply for this position at: Faculty Search, Epidemiologist, Geisel School of Medicine at Dartmouth Attn: Crystal Flaherty Department of Epidemiology 7077 Rubin Building One Medical Center Drive Lebanon, New Hampshire 03756 epidemiology@dartmouth.edu

Geisel School of Medicine is an equal opportunity/affirmative action employer. We particularly encourage applications from women, members of minority groups, persons with disabilities, veterans or any other legally protected group.
